

# Welcome to

# DOGE TRACK

Digital doge racing on the Solana blockchain! The first of it's kind NFT racing game with a metaverse of different tracks and a stable of doges to race and breed. Doges & Tracks can be staked for \$DTRK and track owners get a percentage of the prize pool from each race that happens on their track. Doges can be raced for \$DTRK and races are ongoing on all available tracks on a 24/7 basis. Genesis doges can also be bred to create more doges in the future.

1/10

# DOGES

Doges will be used as characters in the game to race on the Doge Track network. Each doge will have individual race characteristics related to its breed and will have unique visual properties as well. The doge's race traits will determine the likelihood of the doge's ability to win races (this will also be dependent on the types of tracks and other variables in our algorithm). Each doge can be staked for \$DTRK which will be used to race the doges when the racing platform goes live. Genesis doges can then be used for breeding in the future as well. We will only have 1 doge mint, all future doges must be created through breeding.

# DOGE TRAITS

Doges will be minted with many traits that affect their race performance. The class and win percentage of each doge will change depending on how doges do in races. Race traits are:

- Lineage
- Speed
- Endurance
- Agility
- Class
- Win Percentage

**DOGE TRACK**

# DOGE TRAITS

Doges will also have traits that don't affect performance but will affect rarity such as:

- Hats
- Glasses/Goggles
- Masks
- Vests
- Male/Female

# TRACKS

Each track will be unique and will be used for races on the Doge Track network. Track owners can use their tracks to earn \$DTRK based on races that happen on their track. Tracks will have unique properties which will interact with the different doges unique traits to help determine winners in races. Track traits will be mainly length of race (1 lap, 2 lap, etc..) and track type (grass, dirt, or other). For each race the prize pool will be split up between the race winner and the track owner. 80% of the prize pool will go to the winner of the race and the other 20% will go to the owner of the track.

# TRACK TRAITS

Most track traits can be changed by the track owners in the game. The only trait that cannot be changed is location:

- Location (Stadium, City, Space..)
- Track Type
- Track Length (1 lap, 2 lap, 3 lap, 4 lap)
- \$DTRK Entrance Fee
- Class of Doge that can race on your track

Doge traits will interact with track traits to help determine winners. This means that as a doge owner you need to figure out which track configurations are best suited for your doge and as a track owner you need to be changing your traits to meet the demands of the doge racers.

**DOGE TRACK**

6/10

# RACING

Each track owner will be able to set the amount of \$DTRK they want as an entrance fee for racing on their track. A track owner could set their track for 1 \$DTRK entry fee or 1000 \$DTRK entry fee. The class, type, and length of the track will also be decided by the track owners. Doge owners can then login into the platform, select the track they want to race their doge on based on the amount of \$DTRK they want to spend and the track traits that fit their doge best then enter the race. Races will be ongoing 24/7 on the Doge Track network with prizes being released to the winners and track owners wallets in the form of \$DTRK immediately after a race is complete.

# \$DTRK COIN

All races will be done using \$DTRK coin. This is the coin of the Doge Track network that will also be used for our track mint, doge breeding, and our marketplace in the near future. All \$DTRK used in transactions in our track mint, breeding and marketplace will be burned. \$DTRK will have a limited supply that can be earned through staking. Both doge and track owners can stake their NFTs for \$DTRK on our staking platform.

**DOGE TRACK**

8/10

# THE DOGE-O

As an alternative to staking your doge for \$DTRK you can also enter your doge into The Doge-O. While your doge is in the Doge-O it will slowly improve it's speed, agility, and endurance. Doge's will be able to utilize the doge-o to slowly increase their doge's class.

**DOGE TRACK**

9/10

# BREEDING

Once the initial genesis doges are released they can then be bred (male with female). Male doges can be used as “studs” and owners of studs can also receive \$DTRK from the studs being used for breeding. All breeding will be done using \$DTRK. The lineage of the doges created through breeding will be based on the parent doges. This will also affect the racing traits for the bred doges.

10/10

# MARKETPLACE

In the marketplace you'll be able to spend \$DTRK on different visual traits to make your doge even more unique. You can also buy race upgrades to your doge like speed and agility boosts! We will also release our "doge builder" where you can try out different traits on your doge before buying (hats, muzzels, goggles, glasses, and vests!)
